

MSD Format doesn't fit unit

Details **FORMAT DOESN'T FIT UNIT'S SMALLER SIZED CARD SLOT**

Navionics has programmed charting onto the MSD format since 2010 and has included it in the SD adapters. Units that require this smaller media sized chips will require the removal of this MSD format from the SD adapter.

1. Hold the chip so you can read the label.
2. There is a small groove at the bottom of the chip.
3. Gently use your thumbnail to slide this MSD format out of the SD adapter to use in these units.

Charts programmed in 2009 and earlier require a new chart purchase as they are programmed onto the SD or MMC cards directly. <http://www.navionics.com/en/navionics-updates>
