Advertised Power:

kW [HP] @ RPM

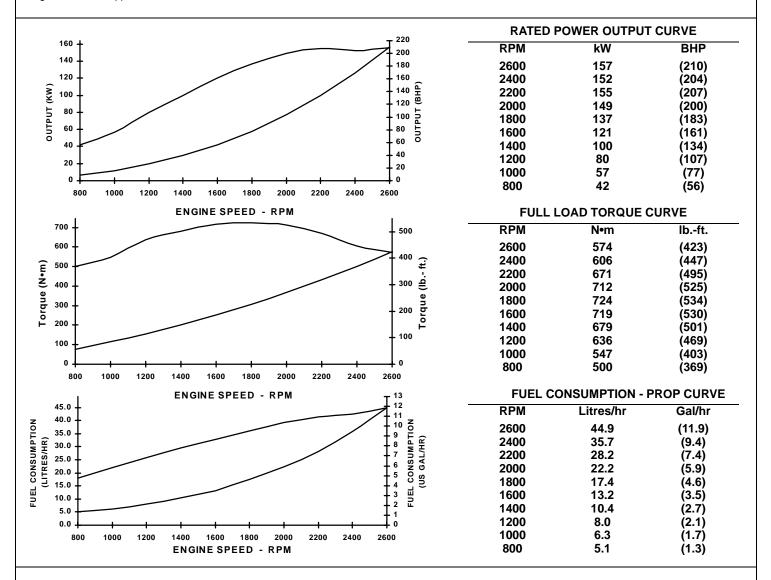

**157 [210] @ 2600** 

[359 in.<sup>3</sup>] Displacement: 5.9 litre [4.02 in.] Bore: 102 mm Stroke:

120 mm [4.72]

Fuel System: **Lucas CAV** Aspiration: **Turbocharged** Cylinders: Rating Type: Intermittent

CERTIFIED: This marine diesel engine conforms with the NOx requirements of the International Maritime Organization (IMO), MARPOL 73/78 Annex VI, Regulation 13 as applicable.

Rating Conditions: Ratings are based upon ISO 8665 and SAE J1228 reference conditions; air pressure of 100 kPa [29.612 in. Hg], air temperature 25°C [77°F], and 30% relative humidity. Power is rated in accordance with IMCI procedures. Member NMMA.

Rated Curves (upper) represent rated power at the crankshaft. Propeller Curve (lower) is based on a typical fixed propeller demand curve using a 2.7 exponent. Propeller Shaft Power is approximately 3% less than rated crankshaft power after typical reverse/reduction gear losses and may vary depending on the type of gear or propulsion system used

Fuel Consumption is based on fuel of 35° API gravity at 16°C [60°F] having LHV of 42,780 kj/kg [18390 Btu/lb] and weighing 838.9 g/liter [7.001 lb/U.S. gal].

Intermittent Rating: This power rating is intended for Intermittent use in variable load application where full power is limited to two (2) hours out of every eight (8) hours of operation. Also, reduced power operation must be at or below 200 RPM of the maximum rated RPM. This rating is an ISO 3046 fuel stop power rating and is for applications that operate less than 1500 hours per year.

# CUMMINS ENGINE COMPANY, INC. COLUMBUS, INDIANA

<sup>&</sup>lt;sup>1</sup>All Data at Rated Conditions

<sup>&</sup>lt;sup>2</sup>Consult Installation Direction Booklet for Limitations

<sup>&</sup>lt;sup>3</sup>Heat rejection values are based on 50% water/ 50% ethylene glycol mix and do NOT include fouling factors. If sourcing your own cooler, a service fouling factor should be applied according to the cooler manufacturer's recommendation.

<sup>&</sup>lt;sup>4</sup>Consult option notes for flow specifications of optional Cummins seawater pumps, if applicable.

<sup>&</sup>lt;sup>5</sup>May not be at rated load and speed. Maximum heat rejection may occur at other than rated conditions.
